In [3]:
```python
import requests
from bs4 import BeautifulSoup

# web scraping the California's Prop65 website
# BeautifulSoup is a python package that helps us to read the html as objec

URL = 'https://oehha.ca.gov/proposition-65/chemicals/abiraterone-acetate'
page = requests.get(URL)

soup = BeautifulSoup(page.content, 'html.parser')
```

In [4]:
```python
# show the html object

soup.prettify()
```

Out[4]: '<html>\n <head>\n <meta content="noindex,nofollow" name="robots"/>\n < script src="/_Incapsula_Resource?SWJIYLWA=5074a744e2e3d891814e9a2dace20bd 4,719d34d31c8e3a6e6fffd425f7e032f3">\n </script>\n <body>\n </body>\n </head>\n</html>'

As we can see, the website is preventing from web scraping. I also try another website, "monster.com", the web scraping result is shown as below.

In [19]:
```python
URL = 'https://www.monster.com/jobs/search/?q=Software-Developer&where=Aust
page = requests.get(URL)

soup = BeautifulSoup(page.content, 'html.parser')
```

In [20]:
```python
soup.prettify()
```

Out[20]: '<!DOCTYPE html>\n<html lang="en" xml:lang="en" xmlns="https://www.w3.or g/1999/xhtml">\n <head>\n <link href="https://coda.newjobs.com" rel="pre connect"/>\n <link href="https://js-seeker.newjobs.com" rel="preconnec t"/>\n <link href="https://css-seeker.newjobs.com" rel="preconnect"/>\n <link href="https://securemedia.newjobs.com" rel="preconnect"/>\n <link href="https://logs2.jobs.com" rel="preconnect"/>\n <link href="https://j ob-openings.monster.com" rel="preconnect"/>\n <link href="https://apis.g oogle.com" rel="preconnect"/>\n <link href="https://www.google.com" rel ="preconnect"/>\n <link href="https://accounts.google.com" rel="preconne ct"/>\n <link href="https://content.googleapis.com" rel="preconnect"/>\n <link href="https://ssl.gstatic.com" rel="preconnect"/>\n <link href="ht tps://www.dropbox.com" rel="preconnect"/>\n <link href="http://js.live.n et" rel="preconnect"/>\n <link href="https://r.turn.com" rel="preconnec t"/>\n <link href="https://www.facebook.com" rel="preconnect"/>\n <link href="https://dpm.demdex.net" rel="preconnect"/>\n <link href="https://m onster.demdex.net" rel="preconnect"/>\n <link href="https://fast.monste r.demdex.net" rel="preconnect"/>\n <link href="https://logs.jobs.com" re l="preconnect"/>\n <link crossorigin="" href="https://fonts.gstatic.co m/" rel="preconnect"/>\n <link crossorigin="" href="https://cdnjs.cloudf
